

EV navigation

For a convenient and individual charging experience

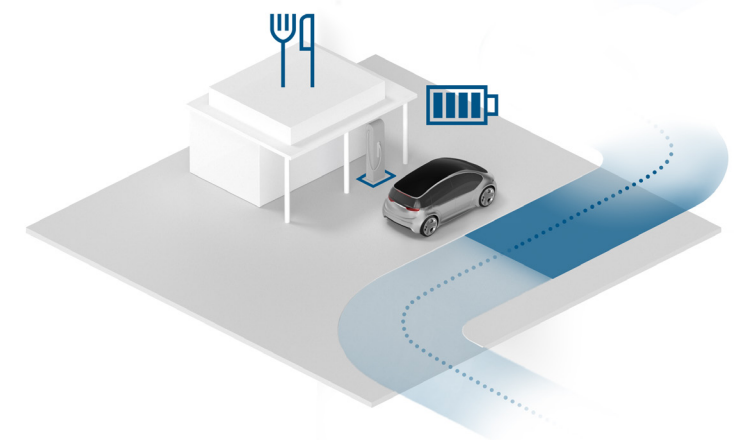

Personalizable

route planning and charge point selection are adapted to the driver's preferences

Comprehensive

and detailed information about each charge point, enabling drivers to optimally plan their charging stops

- Seamless integration of travel and route planning functionality with turn-by-turn navigation
- Personalized recommendations for travel, leisure, and tourism
- Connection of search and reservation functions to data from various providers (e.g. restaurants, sports facilities, and tourist attractions) within a single app
- Seamless user experience through the integration of head unit and smartphone
- Option for OEM-specific branding of services
